

California Rail Builder's Site Specific Health and Safety Plan Policy Statement

It is the policy of California Rail Builders (CRB) to perform work in a manner that insures the health, safety and security of every employee, contractor, emergency responder and the general public. We believe that Safety can only be achieved through proper training, planning and execution of job tasks. "Plan the work and work the plan." It is everyone's responsibility to ensure that all policies, procedures and safe work practices are followed and encouraged. Therefore, safety, prevention of injury, illness, property damage, and environmental impact, must be incorporated into the performance of every employee task. The CRB Management Team, subcontractors and employees are charged with the responsibility for ensuring the safety and security of employees, contractors, emergency responders, and the public who come in contact with Construction Package 4 (CP 4).

Maintaining a training program that addresses health, safety, and environmental issues during construction activities, will foster continuous improvement. Dedicated Management commitment will ensure the development and maintenance of a strong partnership between CRB, CHSRA and Subcontractors. This "Partnership" will prove to be the backbone in accomplishing the Mission.

Management Team
